WEBSCALE

WEBSCALE E-COMMERCE CLOUD PLATFORM

The Fastest, Easiest Way to Run Your E-commerce Business

OVERVIEW

The Webscale E-commerce Cloud Platform provides customers with a tightly integrated, highly customizable solution for easy and rapid deployment of e-commerce applications globally.

OPTIMIZED FOR E-COMMERCE

With a sharp focus on e-commerce since the company's inception, Webscale has developed a deep understanding of the segment's business and technology requirements. As a result, Webscale can automatically identify your application needs and build a best-fit solution for your business.

Additionally, if you have a preferred CDN provider due to your location, or an existing relationship with a specific cloud provider, we can customize the Webscale platform with the components best suited to your business.

FULLY AUTOMATED

With Webscale's patented, cloud-based application delivery controller (ADC), we can better manage site traffic, efficiently scale out your infrastructure, optimize your website content to boost site performance, as well as provide other benefits such as content caching and active error monitoring.
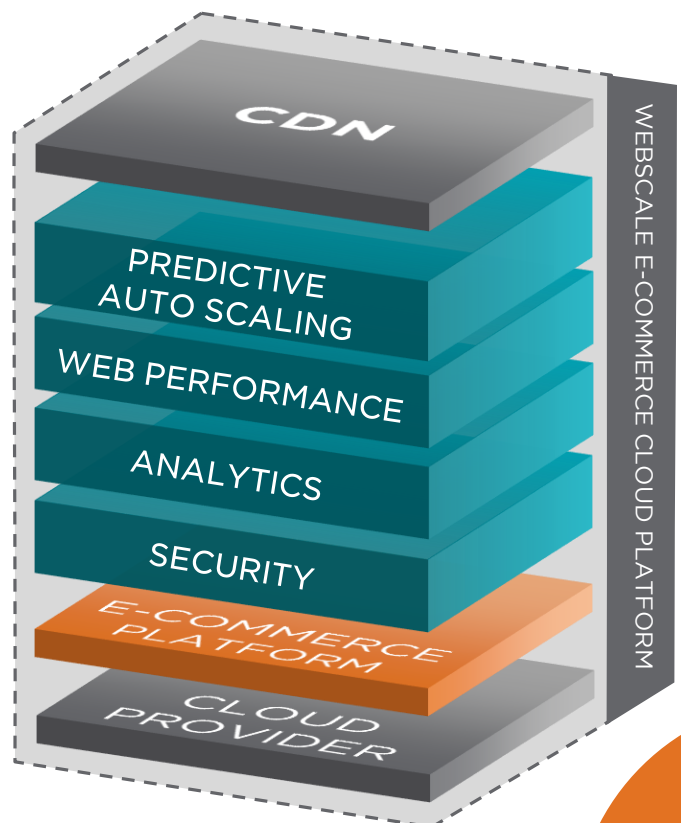

Available in three versions – Basic, Pro and Enterprise – Webscale offers unique options for automated deployment. Webscale Lite can be set up and provisioned entirely through a self-service system in minutes, with no contracts required and no salesperson involvement. For details on each product, please see our e-commerce solution portfolio on page two.

TIGHTLY INTEGRATED

The Webscale E-commerce Cloud Platform dramatically simplifies the task of deploying your storefront to the cloud. From initial engagement and migration, to deployment, ongoing management and 24x7 proactive customer support, the Webscale platform allows you to focus on the day-to-day running of your business, without worrying about your infrastructure.

MAGENTO EXPERTISE

Webscale is a certified Magento partner, and the leading cloud-based infrastructure solution for the Magento ecosystem. The Webscale platform is compatible across all versions of Magento Community and Enterprise Edition, delivering world-class performance, scalability, security and analytics for e-commerce stores of all sizes.

OPTIMIZED FOR: Magento® Enterprise   Magento® Community
